Development, Production and Complete Provision of Protective Equipment.

We have been helping to protect lives since 1992.

GARED s.r.o. is a purely Czech company with a long tradition in the market of manufacturers and providers of bulletproof and riot products.

Our main goal is to continuously improve the protection of our customers' lives through innovative products that ensure maximum safety, usability and comfort, even in extremely demanding conditions. All our products are fully certified and tested in real conditions with end users.

Our customers include police and military forces, prison services, European Border and Coast Guard Agencies, private agencies and organisations, etc.

MANUFACTURER OF BULLETPROOF PROTECTION

Our products have high ability of stopping shots and repetitive hits, strikes or stabs. For over 30 years we have been actively developing and manufacturing fully certified and user tested bulletproof gear.

Bulletproof vests, soft and hard armor plates, plate carriers, other gear and equipment are entirely at the customer's choice.

We supply our products worldwide.

QUALITY OF MATERIAL AND DESIGN

We combine the unique properties of aramid and polyethylene materials resulting in low weight and high level of protection. With a family legacy of sewing, we have a unique approach to development, **resulting in exceptional wearing comfort as well as durability in extreme conditions.**

We offer the possibility to modify catalogue products according to specific requirements.

COMPLETE PROTECTION

Our products are specially designed and modified for maximum performance in your service.

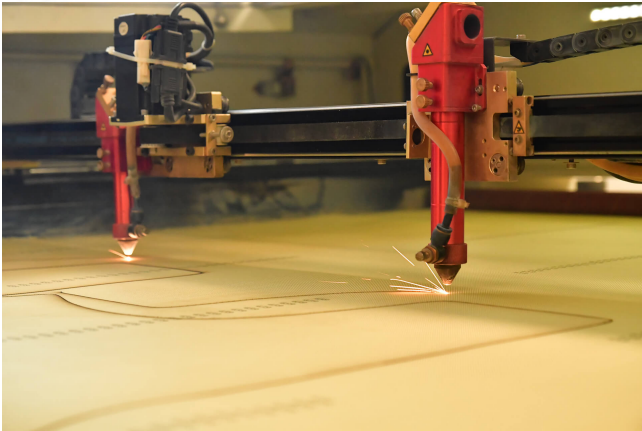

Complete protection provides full compatibility and modularity. Comfort during all-day use is also guaranteed.

During riots you will use the riot suits and in extreme situations a EOD suit can help save lives.

A bulletproof or riot vest is ready for K9 units.

TECHNOLOGY & MATERIALS

CUTTING

- Automatic laser system
- Optimised automatic cutting system
- Automatic laying device
- Conveyor belt
- Hydraulic loaders
- Heavy band saws
- Automatic hot knife divider
- Automatic cutting divider

SEWING

- Automatic industrial sewing machines with programmable pattern
- Ultrasonic welding machines
- Semi-automatic heavy duty sewing machines
- Heavy duty arm sewing machines
- Double needle machines
- Special securing machines for MOLLE system
- Patching machines
- Creasing machines

PRESSES, DIE-CUTS, SOFTWARE & MORE

- Hydraulic die-cutting machines
- Manual stamping machines
- Hydraulic pressing machine
- Vacuum pressing machine
- Automatic packaging machines

SOFT ARMOR – INNOVATIVE BALLISTIC INSERTS GMP

Innovative ballistic inserts are produced in special UV-resistant, waterproof packaging. This ensures maximum reliability and durability of bulletproof properties.

We are working in partnership with a wide range of suppliers and manufacturers of ballistic materials.

Different materials have different properties and advantages.

After years of experience, we are now able to combine the advantages of selected materials to achieve the specific properties required for each ballistic insert according to the customer's requirements.

We take into account many factors, such as weight, flexibility, stiffness, thickness, different types of resistance or price.

All our Innovative ballistic inserts are tested and fully certified in international accredited testing facilities.

HARD ARMOR – BALLISTIC PLATES

Our plates have a high bullet stopping ability.

We produce front, rear, side, neck, abdominal and groin plates compatible with bulletproof vests and plate carriers, not only of our production.

We offer polyethylene plates with low weight and ceramic-composite plates with excellent bulletproof resistance.

MODULAR PLATE CARRIERS

Depending on the combat tactics, you can increase the basic concept of the plate carrier by the following:

- Neck protector (Collar)
- Arms protector (Sleeves)
- Groin protector
- Bulletproof belt

By modularly increasing protection, the carrier can become a fully equipped bulletproof vest.

Holsters, pouches and other equipments are placed and fastened via MOLLE system – PALS binding or Laser Cut.

Specific models are equipped with Quick release system and Evacuation grab/drag handle.

We use high-strength Cordura® materials and thanks to the top quality of sewing, the carrier will not break down even in the most extreme conditions.

GN 750

MODULAR PLATE CARRIER WITH QUICK-RELEASE SYSTEM

The GN 750 model is designed for the most challenging situations. The modularly upgradeable neck, arm and groin protection make the carrier a fully equipped bulletproof vest and provides maximum protection when required. All accessories are removable so the carrier can be used either alone or fully equipped.

FEATURES

- Quick release system
- Evacuation grab/drag handle
- MOLLE - PALS webbing
- Fits precisely to the body at the shoulders and hips
- Variability and modularity

BALLISTIC RESISTANCE according to NIJ STD 0101.04

- Soft armor - IIIA
- Soft armor in combination with hard armor plate - up to level IV

GN 743

MODULAR PLATE CARRIER

The GN 743 model is designed specifically for the needs of police forces as a combination of a plate carrier and a bulletproof vest. The carrier is equipped with all-purpose fixed magazine pouches and UNI document pouches. The position of the pouches is customizable according to the customer's requirements.

The high comfort factor makes this model very popular.

FEATURES

- Evacuation grab/drag handle
- Padded shoulders
- Loops for cable routing

BALLISTIC RESISTANCE according to NIJ STD 0101.04

- Soft armor – IIIA
- Soft armor in combination with hard armor plate – up to level IV

LIGHTWEIGHT PLATE CARRIERS

Our development and production is at the highest international standard.

The plate carrier is a modern concept of a low-profile vest that provides bulletproof protection only to vital organs and offers the user significantly more mobility than a bulletproof vest.

- MOLLE system
- top sewing quality
- quick and easy handling even with gloves
- comfort and compatibility
- user-tested
- fastening of ID labels
- water-repellent materials

All lightweight carriers are available in summer and winter versions and with optional front and rear STA plates.

GN 15

LIGHTWEIGHT PLATE CARRIER

The GN 15 model is designed as bottom insertion type with double protection. In the inner part of the carrier has spacer mesh which helps air circulation. The softening of the mesh also eliminates possible pressure marks during prolonged use.

A special feature of this model is the removable front flap with four magazine pouches that are also equipped with the Laser Cut MOLLE system.

FEATURES

- Laser Cut MOLLE
- Lightweight, minimalist design
- Flexible yet variable side belts
- Sliding softening of shoulder straps
- High-strength plastic buckle fastening

BALLISTIC RESISTANCE according to NIJ STD 0101.04

- Stand Alone plate (STA) – up to level IV

GN 14

LIGHTWEIGHT PLATE CARRIER

High usability of the GN 14 model is based on the quick and easy insertion and removal of hard armor plates thanks to the robust zipper located at the top of the pocket. Designed to be inserted from the top. Maximum possible area of the carrier is equipped with Laser Cut MOLLE, including both summer and winter versions of the sides. Interchangeable flaps in the front part are optional according to customer requirements.

FEATURES

- Laser Cut MOLLE
- Lightweight, minimalist design
- Winter + Summer sides
- Sliding softening of shoulder straps
- Easy shoulder release with Cobra® quick release buckle

BALLISTIC RESISTANCE according to NIJ STD 0101.04

- Stand Alone plate (STA) – up to level IV

BULLETPROOF VESTS – FOR OUTER WEAR

Bulletproof vests for outer wear are designed to be highly modular. The basic set consists of a front and a rear part.

The customer can configure the vest according to requirements, choosing from the following:

- Collar
- Groin
- Sleeves
- Bulletproof belt

We develop and manufacture innovative soft armor that is characterized by low weight, large protective area, and flexibility depending on the situation of use.

- For use by advanced users
- Quick dressing and setting up
- Quick release system
- MOLLE
- And more

RIOT PRODUCTS

RIOT SETS

Are used for protection during demonstrations, riots, crowd control and other potential crisis situations.

- GU-8010

BULLETPROOF RIOT SETS

Increase protection against stabs, projectiles and shrapnel caused not only by explosions.

- GU-8014
- GU-8015

We provide the highest possible user protection, maximum mobility and wearing comfort.

The most frequent users of our sets are police forces, private security agencies and the European Border and Coast Guard Agency.

ADDITIONAL EQUIPMENT

- Riot helmets
- Riot shields
- Riot vest for working dogs

K9 – WORKING DOGS

BULLETPROOF VESTS

Bulletproof vests for working dogs are used by military and police forces in domestic and international missions. We have developed a lightweight soft armor with high bulletproof protection that does not restrict movement. The vest protects the back, abdomen and chest of the dog. The built-in handles allow the dog to be captured or secured with a rope when rappelling. Cameras or other equipment can also be attached to the vest.

RIOT VESTS

Riot vests for working dogs are mainly designed for prison service purposes.

The development was specialised to provide protection against cold weapon attacks (e.g. blunt objects, stone impacts) and against close proximity attacks.

TACTICAL & TACTICAL-BULLETPROOF VESTS

TACTICAL-BULLETPROOF VESTS

Based on the requirements of police forces, we have combined tactical vests with bulletproof vests and developed a 2-in-1 concept that combines the advantages of both tactical and bulletproof properties.

This concept eliminates the necessity of wearing an additional bulletproof vest under the top tactical vest, which improves comfort for the end-user.

The tactical-bulletproof vests are designed for the possibility of inserting soft armor as well as hard armor plates, making them ready to serve as full bulletproof vests when needed.

TACTICAL VESTS

We combine different types of high quality and permeable materials. The development also focuses on wearing comfort.

Our vests are produced in UNI sizes adjustable to height and waist circumference.

We produce 2 series – vests with fixed holsters with selectable placement or vests with MOLLE – PALS webbing.

EOD PROTECTION

LIGHTWEIGHT EOD SUIT GPO 01

The development was primarily focused on reducing the physiological load of the EOD and reducing the weight by approximately 20%.

The lightweight EOD suit provides a high level of protection and is designed to be worn over overalls.

Maximum protection is primarily focused on critical areas of the body. Specifically neck, chest and groin area.

The level of protection can be customised.

The bulletproof resistance and the used materials are also specified by the customer according to their requirements.

BASIC COMPOSITION OF THE SUIT

- An EOD vest that contains:
 - Pocket for additional 250 x 300 mm bulletproof chest plate
 - Removable anti-fragment plate that covers the entire chest area
 - Removable collar with pocket for additional neck plate
- Removable sleeves
- Groin protection with removable pocket for additional groin plate
- Adjustable trousers with flexible knee system
- Insteps protection

BULLETPROOF BLANKETS AND BACKPACKS

BULLETPROOF BLANKETS

The bulletproof blanket is a multifunctional product that allows, in addition to operational protection of persons, to assemble bulletproof protection to cover doors, windows and other things, including protection during forced entry into the building.

BULLETPROOF BACKPACKS

- Basic protection IIIA according to NIJ STD 0101.04 in the the whole area of the back of the backpack.
- Possibility to insert additional hard armor plates up to resistance IV according to NIJ STD 0101.04
- Usable also as a passive protection.
